

**TREVI GROUP SECURED CONTRACTS & ORDERS FOR A TOTAL OF
€140 MILLION IN APRIL AND MAY 2025, INCREASING ITS ORDER
BACKLOG AT €715 MILLION AT THE END OF MAY 2025**

**SINCE THE BEGINNING OF THE YEAR, THE GROUP SECURED NEW
CONTRACTS & ORDERS FOR A TOTAL OF €278 MILLION**

Cesena, June 23Th, 2025 _ **Trevi S.p.A.**, a division of the Trevi Group specialized in special foundations and soil consolidation works for large infrastructure projects, and **Soilmec S.p.A.**, a division of the Trevi Group which designs and manufactures machinery and equipment for underground engineering, in line with the positive trend at the beginning of the year, secured contracts and orders for over €140 million in April and May 2025. Thanks to these acquisitions, the Group's order backlog at the end of May 2025 stood at €715 million.

"In addition to the recent acquisitions that have consolidated our Group's order backlog," emphasizes Giuseppe Caselli, CEO of the Trevi Group, "we are working, with good prospects, on other interesting development opportunities both in Italy and abroad".

The main acquisitions of Trevi Division in April and May 2025 were:

- **United States: Treviicos**, the American subsidiary, was awarded, in joint venture, a new contract for the execution of foundation and consolidation works required for the construction of the **new railway tunnel in Manhattan** (New York City). The project, as part of the broader Hudson Tunnel initiative, is expected to significantly enhance capacity along the Northeast Corridor, the busiest passenger rail line in the United States.
- **United Arab Emirates:** Trevi's local subsidiary, **Swissboring Overseas**, has acquired two major contracts for the foundation works of two new residential complexes.
- **Italy: Trevi S.p.A.** was recently awarded a contract for an environmental remediation project at a former mining site. The intervention involves securing the area and remediating both the soil and the underlying groundwater. In addition to eliminating sources of contamination, the environmental restoration efforts will enable the site's conversion for productive use or broader territorial redevelopment.

- **Malta: Trevi S.p.A.**, through its local subsidiary, acquired the continuation of the seabed consolidation at Ras Hanzir in the Grand Harbour of Valletta.

The Soilmec Division, in the first two months of the second quarter 2025, acquired new machine and service orders for approximately €36 million.

About the Trevi Group:

The Trevi Group is a world leader in 360-degree subsoil engineering (special foundations, soil consolidation, recovery of polluted sites), in the design and marketing of specialized technologies in the sector.

Founded in Cesena in 1957, the Group has about 59 companies and, with dealers and distributors, is present in 90 countries. Among the reasons for the success of the Trevi Group are the internationalization and integration and continuous exchange between the two divisions: Trevi, which carries out special foundation works and land consolidation for large infrastructure projects (subways, dams, ports and docks, bridges, railway and motorway lines, industrial and civil buildings) and Soilmec, which designs, manufactures and markets machinery, systems and services for underground engineering.

The parent company (Trevi-Finanziaria Industriale S.p.A.) has been listed on the Milan Stock Exchange since July 1999 in the Euronext Milan sub-fund.
