

## TREVI GROUP: NEW CONTRACT AWARDS IN ASIA-PACIFIC REGION FOR €117 MILLION

**Cesena, June 22, 2026** – Trevi Group, a global leader in underground engineering, has recently secured two new projects in Asia-Pacific region, with a total value of approximately €117 million.

The new contract awards, in Papua New Guinea and Indonesia, are part of the Group's geographic balancing strategy, in line with and in implementation of the strategic guidelines set out in the 2026–2029 Business Plan, which aims to allocate the backlog across countries and project types and strengthen the Group's positioning in high-value-added specialist activities.

- In Papua New Guinea, the Group will be engaged in a project within a particularly challenging geological and environmental context. The project, characterized by significant operational and logistical complexities due to its location, requires specialized works aimed at stabilizing and controlling subsoil conditions in proximity to a strategic industrial area.
- In Indonesia, the Group will be involved in the construction of foundation works and marine structures supporting the development of port infrastructure, in a context requiring high execution standards and strong integration between engineering expertise and construction capabilities.

The award of these contracts contributes to the strengthening of the order backlog and confirms Trevi Group's ability to operate in highly complex technical environments, demonstrating its reliability in addressing particularly demanding operational challenges and consolidating its positioning as a reference partner in the execution of highly specialized works.

*“These contract awards reflect the Group's ability to develop its presence in line with the strategic guidelines set out in the Plan,”* said Giuseppe Caselli, Chief Executive Officer of Trevi Group. *“Our entry into Papua New Guinea and Indonesia represents an important step in the Group's international expansion path and confirms our capacity to operate in new markets with distinctive expertise and a specialist approach. Alongside other recent awards, these projects contribute to increasing visibility on business developments over the coming months and further strengthen the order backlog.”*

### **About the Trevi Group:**

*The Trevi Group is a world leader in all-round ground engineering and in the design and marketing of specialized technologies in the sector. Founded in Cesena in 1957, the Group has approximately 65 companies and, with dealers and distributors, is present in 90 countries. Among the reasons for the Trevi Group's success are internationalisation and integration, as well as continuous exchange and interaction between the two divisions: Trevi, which carries out special foundations and soil consolidations for large infrastructure projects (subways, dams, ports and docks, bridges, railway and motorway lines, industrial and civil buildings) and Soilmec, which designs, manufactures and markets machinery, plants and services for underground engineering. The parent company, Trevi-Finanziaria Industriale S.p.A., has been listed on the Milan Stock Exchange in the Euronext Milan segment since July 1999.*
