

A HISTORY LONG OVER 55 YEARS

Trevi Group is a worldwide leader in ground engineering at 360 degrees (special foundations, tunnel excavation, soil consolidation, recovery of polluted sites), in the design and marketing of specialist technologies in the sector, in the field of drilling (oil, gas, water), both as a rig manufacturer and as a service provider as well as building automated, underground multi-story car parks .

Founded in 1957 , Trevi Group has more than 40 branches and a presence in over 80 countries. Trevi Group's success is based on the integration and the continuous interchange among its different divisions: **Trevi**, that supplies special services in ground engineering, **Soilmec** , that manufactures and develops rigs and equipment for ground engineering, **Petreven** active in oil drilling services and **Drillmec** that produces and develops conventional and automated drilling rigs (oil, gas, water).

Among the many projects that, in these 55 years of activity, have left an indelible mark in the history of the sector you can note: the construction of the **Ertan Dam** in China, the consolidation of the **Tower of Pisa**, the construction of the new **Library of Alexandria** in Egypt, the foundations of the **Vasco da Gama Bridge** over the Tagus river in Portugal, , the foundation works of the new **World Trade Center** in New York, the consolidation of the niches of the **Buddhas of Bamiyan** in Afghanistan and the participation in the project of recovery of **Costa Concordia**.

The parent company (*Trevi - Finanziaria Industriale S.p.A.*) is listed on the Milan Stock Exchange since July 1999.
