

_ Institutional Profile _

The **Trevi Group** is worldwide acknowledged in the field of foundation engineering (special foundations), tunnel excavation, soil consolidations, recovery of polluted sites, in the design and marketing of relevant special technologies, in the drilling field (oil, gas and water) both with regard to the production of systems and to the supply of services, but also in the execution of multi-story automatized and underground car parks.

Since 2007, the Group has been also active in the field of renewable energies (offshore wind power and geothermal), with the Division Trevi Energy.

The Group was established in 1957 and it has currently 44 operating Companies in 32 countries with 55 business units. The success of the Trevi Group is based on the integration and interchange among its four divisions: the **Trevi Division** which carries out specialized services within the foundation engineering, the **Soilmec Division** which produces and develops rigs and systems for the foundation engineering, the **Petreven Division** which supplies oil drilling services and the **Drillmec Division** which produces and develops drilling rigs (oil, gas and water).

The Holding (*TREVI – Finanziaria Industriale S.p.A.*) has been listed at the Milan Stock Exchange since the month of July 1999.

The main economic indicators for the 9M11: Total Revenues € 724 million; EBITDA € 97 million; EBIT € 62 million and Order Backlog € 1,021 million.
